Your Scientific profile

Title of your master thesis

Short summary of your master thesis

Key publication (link, reference or title of publication or student project)

Your Interests

Please indicate your special interest in each of this year's project proposals (see website for further project details). This information will be used to generate an initial matching list between you and the projects. It is therefore required that you have a strong profile with clear research interests, i.e. you should have both low and high interests. Please also note that several of the projects have listed special requirements for applicants with their project synopsis found on our website.

	Low	Medium	High
01 How to achieve "entity awareness" in deep learning models for hydrological applications? (DAAD scholarship)			
02 Non-intrusive calculation of homogenized material properties for non-periodic and non-linear microstructures (DAAD scholarship)			
03 Doctoral Project in the group of André Platzer, the Alexander von Humboldt Professor for Logic of Autonomous Dynamical Systems (doctoral position, employment at KIT)			
04 Replacement of chemistry simulation by machine learning in an Earth system model (doctoral position, employment at KIT)			

Your Documents

Please ensure to include ALL of the following documents for a complete application via the online application system. Please note that failing to do so will substantially delay the processing of your application.

- The completed Scientific profile form
 - CV
 - Motivation letter
 - All academic records including Master transcript of records, Bachelor certificate and transcript of records and High School Certificate. If you have already received your Master certificate, you should also include it, but it's possible to hand it in later (by the start of your doctoral phase). Please also include official English translation of Master and Bachelor transcripts.
